

DISTANCE LEARNING

Distance learning is offered through Chinook School Division's Cyber School using a specialized website called Moodle for students primarily in grades 11 & 12 (at Cabri School sometimes grade 10's will have the option of taking a distance learning course). It offers the **opportunity for students to take a course that is not offered at our school or is offered at a time that does not work with a student's schedule. It is not intended to replace classes with teachers at Cabri School but improve student's course options when we do not have staff available to teach specific courses.**

Students who take a distance learning (DL) class have to be **self-motivated and committed to completing the course in the allotted time.** Teachers of DL classes are teachers throughout Chinook School Division and every student at Cabri School is assigned a staff member from our school who will oversee student progress to help support their success. If students have **questions** in a DL class the first person they need to contact is the teacher of the course. If their problem is not resolved, they must next go to their Cabri School support teacher. If you have any questions about distance learning, please check out Chinook Cyber School's website at <http://chinooksd.ca/school/cyberschool/Pages/default.aspx> or give Cabri School a call.
